SV Series 3.0 Vertical

***Heavy Duty
Industrial Vacuum
Cleaner***

Salient Features :

SV Series 3.0 Vertical is designed with a Three phase side channel blower directly mounted on the top of the machine along with filter with large filter surface area providing a silent and efficient vacuum and airflow for various Heavy duty applications in industries. The Unique design of the Filter system ensures longer running time without the need of cleaning the filter and comes along with a Mechanical filter shaker for hassle free filter cleaning as and when required by the Operator without the need of opening the filter chamber or collection container.

The Robustly constructed frame with heavy duty steel can withstand any kind of tough environments and the Detachable drop down type dust containers fitted with sturdy castor wheels ensures that this machine can be deployed in varied applications and it is easy to handle.

Due to its versatility and endurance, SV Series 3.0 Vertical machine can be used in any on line vacuum system or in any customized centralized vacuum system as per the requirements.

Technical Specifications:

Description	Unit	SV Series 3.0 Vertical
Voltage	V	415
Frequency	Hz	50
Electrical Protection	IP	55
Insulation class	Class	F
Rated Power	KW	2.2
Air Flow	m ³ /h	300
Vacum Max	mmH ² O	3000
Noise Level	dB(A)	76
Container Capacity	Liters	85
Filter Type	Type	Star
Filter Surface	cm ²	20000
Filter Material	-	Polyester
Filter Class	-	L
Inlet	mm	80
Dimension	(L×W×H) cm	82×67×172
Weight	Kg	98
